

Surprise!! I've been working on a little secret project with [@annasiims](#) and I can finally reveal it! ✈

Since it's summer and so many of us are getting ready to catch a flight, I thought it would be the perfect time to give our Sims a similar experience! This mini-set lets your Sims travel in style, featuring decorative suitcases and bags, plus an override for your Sims to use when travelling on getaways or stays.

Here's a look at all the colours included:

The override comes in 8 different colours, and due to game limitations, you can only have one colour installed at a time. Please also make sure you don't already have another version of this override in your game! If you are unsure, there is also a version with random colors so your sims can have different ones and not look all the same.

SUITCASE OVERRIDE

AURE SET

Your Sims are officially ready to travel in style! I hope you guys have fun with this little mini-set! ➦

The set contains a total of 5 items + 1 override (8 options available):

- Suitcase V1
- Suitcase V2
- Suitcase V3
- Suitcase V4 - laying flat

- Traveling Bag
 - Suitcase override (8 options)
-

COMPATIBILITY

Everything is **base-game** compatible with the exception of the suitcase override which requires **Growing Together**.

Some items share the same texture so you need to have all the files in your mods folder for all items to work properly.

TIPS

You can find the items easily in your Build/Buy Catalog by typing in "**LUKHEYA**" or "**AURE**". You can mix the suitcases, stack them and also use the "size up/down" options to have more variations.

INFO

- Low poly & maxis match meshes
- Do not re-upload & claim as your own or include in build downloads
- Always redirect to this page if sharing
- Some items share the same texture so you need to have all the files in your mods folder for all items to work properly.

DOWNLOAD

Only download **one version**: un-merged or merged version and place in your mods folder.

For the override, only choose **one version** and place in your mods folder. You can switch it up from time to time, but remember to always have only one version in game at a time.
